Danderine and we can PROVE IT! The Great DANDERINE Never Fails to Produce the Desired Results.

Tenlivens and invigorates the hair glands and tissues of the scalp, resulting in a continuous and

increasing growth of the hair. Letters of praise are continually coming in from nearly all parts of the country stating that Danderine has renewed the growth of hair in cases that were considered absolutely hopeless.

A lady from Brooklyn writes: "After a short trial my bair stopped failing, and I now have a lovely head of hair, very heavy and over one and a quarter yards long."

Danderine stimulates the scalp. It is the greatest scalp invigorator known. It is a wholesome medicine for both the hair and scalp. Even a small bottle of it will put more genuine life in your hair than a gallon of any other hair tonic ever made. It shows results from the very start.
